

FOR IMMEDIATE RELEASE**Hayes Software System Announces TIPWeb 2.3.20**

Austin, TX, October 25, 2006:

Hayes Software Systems, a leading provider of K-12 textbook management software solutions, today announced the release of TIPWeb 2.3.20. TIPWeb is the only comprehensive inventory control and order management solution for K-12 school and school district textbooks.

TIPWeb software communicates instructional material inventory information through a web-based, centralized application. District and campus users have real-time access to current inventory counts, exact textbook needs based on course enrollment, order management functionality, and easy to use reporting features.

School districts choose textbook management software to streamline the day-to-day tasks at their campuses as well as their central purchasing office and warehouse. TIPWeb is also equipped to increase labor efficiency and accountability during the most critical crunch times, start and end of the school year, through the use of barcode automation technology.

The TIPWeb solution gives school districts and campuses complete control of their textbook inventory, minimizing staff labor and increasing accessibility of resources. This release of TIPWeb 2.3.20 supports improvements to usability, stability, and software security.

- *Additional alerts in the district and campus views allow quick access to high priority tasks.
- *Aesthetic enhancements ensure consistency and increase software performance.
- *Enhanced search options are available in the district view as well as additional reporting functionality in both district and campus views.

"Districts need to comprehensively manage their third highest yearly expenditure, and TIPWeb is the only solution that addresses key areas of textbook management," said Michael Hayes, Presidents and CEO, Hayes Software Systems. "In addition, TIPWeb makes the entire process of managing textbooks at the district and campus levels much easier for staff, by providing all the information necessary to quickly and efficiently address critical tasks."

About TIPWeb Software

TIPWeb is a browser-based application that streamlines the control and supervision of textbook inventory. TIPWeb is a centralized management tool to increase accountability of instructional materials while minimizing requirements on technology resources. TIPWeb incorporates barcode automation technology with time saving software features to minimize the highly clerical job of textbook management. TIPWeb 2.3.20 is currently available with per site pricing based on the number of secondary and elementary locations at a district. Contact the Hayes Software Systems sales office at (800) 749-5086 for more information.
