

Park It Software System Requirements

Note: Minimum hardware requirements demonstrate the slowest, least powerful system that could be used to run our software. While the software will load and run successfully on this system, users may experience delays and other inconveniences. In addition, computers with minimum hardware requirements may not be able to run the software successfully with larger databases.

Requirements revised 8/1/2006

	Minimum (see note below)	Recommended
CPU (MHz)	200 Pentium	400 Pentium II or faster
RAM* (MB)	64	128 or more
Hard Drive (MB Free)	50	100 or more
SOUND	No	Yes
NETWORK	No	Yes (100Mbps)
INTERNET CONNECTION	No	Yes
MOUSE	Yes	Yes
CD-ROM Drive	No	4x or faster
3.5" Floppy Drive	Yes	Yes
Web Browser	No	Yes (I.E. 5.x)
E-mail	No	Yes
Display Resolution	800x600 (SVGA)	800x600 or higher
Display Size	14"	15" or larger

Available for: Windows 98, 2000, XP, NT3.51, NT4.

Note: Computers with the minimum required components will be able to load and run Park It. Performance, however, will be barely acceptable. As with all other software applications in the market today, the more powerful the computer the better the performance will be.

* If running Windows XP, add 128 MB to the "Minimum" and "Recommended" amounts.
